36 in. M. Dor. A very pale yellow self, almost white, (primrose-yellow 601/2) with a good green throat. The erect, stiff stems carry 30 or more medium to large, ruffled flowers that are diamond dusted. The blooms are good for more than 12 hours, and often times have four and five petals and sepals. Best planted in late afternoon shade.

DARK MAGIC (Carl Carpenter, 1956)

Each \$5.00

40 in. L.M. Dor. Large open flower of dark velvety red with broad petals and sepals. The small cup is deep golden yellow. Well branched with strong stems. The flowers have heavy substance and are sun resistant.

ECSTATIC (G. Douglas, 1956)

Each \$15.00

28-30 in. M.L. Dor. A very beautiful melon toned Daylily, with a bright currant-red band or halo. The petals are orange-buff 507, and the sepals are slightly darker than the petals. The flowers are of heavy substance, slightly ruffled and are diamond dusted. The 4½-inch flowers are excellent in the sun. One of our favorite Daylilies from Mr. Douglas.

EVENGLOW (Terry, 1956)

Each \$8.00

26 in. E.M.L. Semi-Ev. A five-inch flower of flat Dutch Amaryllis form. Semi-dwarf, carrying its lovely blossoms just above the foliage. The overlapping 2-inch petals and the 1¼-inch sepals, ruffled and creped, are a glowing gold with an overflush of red that fairly glows in cool or wet weather, a lighter peachy shade with pinkish tints in hot, dry weather. Never any burning even in 100 degree temperature. Wonderful parent both ways, transmitting its superb form to its seedlings in many colors. (Description by Terry).

FRENCH LADY (G. Douglas, 1956)

Each \$7.50

36-40 in. M.L. Dor. Slightly ruffled, diamond dusted lemon-yellow of velvety texture and heavy substance. The full, widespread, medium to large flowers are excellent in the sun, and bloom over a long season. In 1955 FRENCH LADY started blooming in June, and was still in full bloom the middle of August. A fine addition to your Daylily garden.

GREEN GOLD (Kenneth Smith, 1956)

Each \$15.00

42 in. E.M. Dor. The basic color is light primrose-yellow overlaid with pale green; the green intensifies to lime-green in the throat. Garden effect is a lovely cool green-yellow. Broad petals of excellent substance are slightly ruffled and form a flower of grace with funnel-shaped throat and curving segments. Stalks are stiff, with four branches and 30 buds.

HEAVEN BENT (Bechtold, 1956)

Each \$7.50

28 in. M.L. Dor. A full, widespread, large, smoothly finished flower of broad petals and sepals in citrus-sulphur-yellow. A self that is a heavy performer with excellent substance. The branching is good on erect, stiff scapes. An excellent garden variety.

PERSONALITY (Terry, 1956)

Each \$10.00

36 in. E.M.L. Semi-Ev. Put personality into your Daylily planting with this aptly named rosy red with the artistic form! A 6- to 8-inch flower with sepals that recurve fully and petals that flare out to their extreme length and gracefully twist at the ends. Basic petal and sepal color is watermelon-red, lightly veined darker red, with star-shaped greenish yellow throat. Excellent texture, unfading color, and a repeat bloomer. Lovely in arrangements. Junior Citation, A.H.S., 1954. (Description by Terry.)

SUMMER EVENING

SUMMER EVENING 49-2 (G. Douglas, 1956)

Each \$10.00

30 in. M. Dor. A very dainty, ruffled, yellow (Aureolin 3/1) Daylily that comes into bloom about four o'clock in the evening. The small, funnel-shaped flowers are diamond dusted, and have medium substance. Very lovely in table arrangements.

WHITE ELF (Bach, 1956)

Each \$5.00

32 in. M. Dor. The 4-inch, slightly ruffled flowers are a very pale cream (Dresden-yellow 64/2), giving a near white effect in the garden. The green of the throat runs out far into the petals and sepals. This evening flowering Daylily needs mid-afternoon shade.

WHITE TRIANGLE (Bach, 1956)

Each \$15.00

28 in. M. Dor. The very, very pale cream self (primrose-yellow 601/2), of triangular form, gives a white effect in the garden. The medium to large flowers are diamond dusted, and are nicely ruffled. The throat is a good, deep green. WHITE TRIANGLE is one of the best of Mrs. Bach's "near" white creations.

GENE WILD, Cooper No. 6 (Dr. H. C. Cooper, 1956)

Each \$20.00

M.D., M.H., N.F. Dr. Cooper describes his seedling as: "Medium pink over white, or medium to lighter pink, occasionally marked crimson. Midseason. Good stems; thrifty; buds open well. You will love this Peony." And love this Peony, I do! For 3 years I have watched it, and especially its fine performance on the show table. Blooms have remained on display here for almost 2 weeks before they had to be replaced. When Dr. Cooper visited us in May, 1955, I was telling him of the fine qualities of this seedling, and found myself honored by his naming it for me.

Mr. and Mrs. Byron Gist, Amarillo, Texas, made a magnificent arrangement in their beautiful cut glass punch bowl of this seedling that about "knocked over" their guests and garden visitors. June 3, 1954, Mr. Gist wrote: "Among the Peonies (blooms) we brought home with us was a very light pink, heavily marked with red and tagged Cooper No. 6, which attracted much attention and outlasted any others of the lot." Pictured on front cover of 1956 catalog.

1956 Parade of HALL'S DAYLILIES

CHEERY PINK 52-53 (Hall, 1956)

Each \$15.00

EVERGOLD 52-46 (Hall, 1956)

34-36 in. M.L. Dor. A wonderful large, ruffled, deep gold self that is sun resistant in the hottest weather. Heavy, stiff, erect scape carries 30 or more buds on its low, wide and multiple branching. Full, broad petaled and sepaled flowers are widespread, of heavy substance. Diamond dusted flowers blooming nicely above erect, broad, green foliage remain open for 16 or more hours. J. C., 1955.

Each \$10.00

GOLDEN WONDER HW-151 (Hall, 1956)

32-42 in. M.L. Dor. For a grand display in your garden, add this golden yellow self that made such a wonderful display in our fields in 1955. The large, recurved, diamond dusted flowers of heavy substance remain open 16 or more hours, and are borne on erect slender scapes. J. C., 1955.

Each \$7.50

HOLIDAY MOOD 51-58 (Hall, 1956)

33-37 in. M.L. Dor. HOLIDAY MOOD, a light medium red blend (Mandarin-red). Broad, ruffled petals and sepals and magnificent branching. Full, widespread flowers of sun resistant qualities really like the sun and warmth. Stiff, heavy and erect, yet graceful scapes. Heavy veining and velvety finish of these large, excellently substantanced flowers give a deep red effect.

Each \$15.00

HOLIDAY TAN 51-91 (Hall, 1956)

36-48 in. M.L. Dor. HOLIDAY TAN, by the color chart, orange-buff, but all who have seen it call it buff with pink tints, is one of Gene's favorites. The ruffled, diamond dusted pastel flowers are sun resistant. The branching is superb. Each scape carries 80 and more buds (I stopped counting buds at 80).

Each \$15.00

IMPERIAL BLUSH 51-21 (Hall, 1956)

36 in. E.M. to M. Dor. Broad petaled (overlapping petals) and sepaled shell-pink 516. Flowers fade pleasingly by evening to a lovely tint (the lightest) of shell-pink. A wonderful flower the entire day, and the flower improves as the day goes by. The slightly ruffled, diamond dusted flowers possess heavy substance. Full, widespread flowers are large for a pink, as the diameter of the flower is 5 inches.

Each \$15.00

MAGIC DAWN 50-09 (Hall, 1956)

36-40 in. E.M. to L. Dor. Another great favorite with us! MAGIC DAWN is a wonderful, recurrent blooming rose-pink (delft rose) that is ruffled, diamond dusted and of medium to heavy substance. Full, slightly recurved flowers, possessing yellow to green throat, remain open 16 or more hours, and on a hot, dry day fade, but do not burn, to delft rose 020/3. Heavy, erect and arching scapes of medium yet ample branching carry 25 to 35 buds. An outstanding quality of MAGIC DAWN is the recurrent blooming factor. It bloomed every day in 1955 from the time it started early in the season until early fall. J. C., 1955. Pictured on front cover.

Each \$17.50

PINK ORCHID HW-122 (Hall, 1956)

34-40 in. E.M. to M.L. Dor. Heavily ruffled, large flowers in shades of salmon, peach and shell-pink give the effect of smoke-pink in mass. Midrib of the petals and the edges of the sepals lavender (amaranth-rose). The pink deepens just above the yellow to green throat. The widespread petals and recurved sepals of medium to heavy substance, sun resistant. Slender, graceful, stiff scapes of good branching. PINK ORCHID attracts much attention. J. C., 1955.

Each \$15.00

PINK PUNCH 49-25 (Hall, 1956)

36-42 in. M.L. Dor. PINK PUNCH is a blend of coral-pink with a deeper coral-pink halo, and a golden yellow to green throat. Large ruffled and heavily substantanced flowers remain open for 16 or more hours. In full sun the flowers fade to a light color leaving a distinct halo.

Each \$5.00

PINK SONG 51-74 (Hall, 1956)

28-32 in. M. Dor. A slightly ruffled, diamond dusted pink of medium size and substance, not on the blue side. Color is given by the color chart as carrot-red 612/1. Horticultural example is carnation-tangerine. Mrs. O. W. Lacey describes it "a lovely silver-pink of good form, good branching and with lots of buds."

Each \$15.00

PREMIER 52-04 (Hall, 1956)

36 in. M. Dor. A wonderful red Daylily with broad petals and sepals of excellent substance and excellent scapes. This grand Daylily from Mr. Hall took the 1953 National Meeting of the American Hemerocallis Society by storm. J. C., 1955. Limited stock for 1956.

Each \$25.00

SURPRISE PARTY 50-35 (Hall, 1956)

34 in. M. Dor. A pale pink from two seedlings several generations removed from Mission Bells and H. fulva rosea, that has certainly been a surprise. The surprise came when the A.H.S. judges voted a Junior Citation in 1955 to 50-35. We have noted that on dry, hot days SURPRISE PARTY was good until evening. Since SURPRISE PARTY does curl on hot, humid days, we suggest that you plant in afternoon shade. J. C., 1955.

Each \$5.00

HALL'S RED COLLECTION
NEW HALL GLISTENING RED DAYLILY SEEDLINGS
(MIXED) **\$4 EACH**
3 FOR \$10

These were selected from the best of the 1949-1953 crops. They will vary in shade, shape and type as shown here. We have found the red varieties propagate more slowly than the other colors. You will not get two alike but we cannot guarantee any particular shade or depth of color. They will make very attractive garden clumps and will be valuable for amateurs and professionals alike who would like to try creating new seedlings.

CERTIFICATE of INSPECTION With Each Order

We exercise the greatest care to keep our plants true to name and are willing at any time to replace, on proper proof, all stock that may prove untrue. We ship healthy, thrifty roots freshly dug from our fields and gardens. Anyone not entirely satisfied should return stock immediately and proper adjustment will be made. We CANNOT assume responsibility after safe delivery. Of course, you would not expect us to replace stock lost due to freezing, bad drainage, drought, heat, carelessness, neglect, or lack of experience on the part of the planter. The above mentioned conditions are entirely beyond our control and we cannot be held responsible for stock when lost because of them. No complaints can be entertained more than one month after delivery.

HARI-AI-NIN (Babcock, 1929)

Each \$2.00

M. J. Red. M.H. Very large deep red guards with staminodes tipped yellow.

Japanese Peonies are most artistic for floral arrangements, and they last as long or longer than the full double types. The open flowers are extra wide spread with two or more layers of broad guard petals which act as a cup to the mounted center. They produce an enormous amount of flowers, creating a riot of color in the garden. Because of their strong stems you never see them in the mud after a rain.

HYBRID and SPECIES PEONIES

This new race of early bloomers is of surprising beauty, giving entirely new shades, and reds more brilliant than any regular red variety. They start blooming about ten days before the common Peonies, and the latest of them bloom with the first common kinds. They should be represented in every garden.

Blooms are cup-shaped, brilliant, orange-scarlet-red, enclosing a mass of pure golden stamens. Extremely heavy and sturdy stems. Foliage rather coarse, but of a beautiful, colorful green that is attractive. A truly grand origination. A real gem and one of the first to bloom in the garden.

MARTA (*Saunders, 1938*) **Each \$4.00**
E. D. Red. V.T. Brilliant, lustrous, deepest mahogany-red with touches of white on some petals. Often much like a Japanese type in its composition. Very interesting.

Dear Friends:

We sincerely hope you are enjoying our new Peony, Iris, and Daylily catalog. We are extremely proud of this issue—with its many new illustrations and long descriptive list of varieties; may we call your special attention to the outstanding new Hall daylilies and the other truly fine 1956 introductions. Although our catalog seems most complete, there are many unlisted varieties which we have in stock and can supply.

To our new customers who have never grown peonies, iris, or daylilies, we know you will find our hardy, top-quality plants easy to grow. These 3 flowers exhibit an exciting panorama of color and the beautiful blooms are delightful when displayed in the garden or cut for arrangements. If you have a small garden space, a limited gardening budget, or if you are an experimenting beginner, we suggest that you select some of the special collections which give you several of the most popular and best plants at tremendous savings.

We wish to express our thanks for your past orders and we are looking forward to serving you in the future.

Sincerely,

The Wilds of Missouri

A very exquisite and elegant Peony to add to your garden.

MASSASOIT (*White-Wild & Son, 1954*) **Each \$20.00**
V.E. S. Red. 30 in. A brilliant dark red Officinalis hybrid from the cross of Richard Carvel x Officinalis Anemoneflora Aurea Ligulata. The blooms are cupped; the habit and vigor of the plant are especially good. MASSASOIT is similar to Prof. Saunders' Challenger group in that the anthers are yellow with red stripes on the sides giving a unique appearance to the bloom. The carpels are green and hairy with pink tips; the filament is red. The foliage is particularly lovely when immature. The stems are very adequate to carry the blooms.

FORT TICONDEROGA (*Smith, 1948*) Each \$1.50, 3 for \$3.50

FRANCES KENT (*DeForest, 1951*) Each \$5.00

FRANCES KENT

FLORA WHITING (*Whiting, 1953*) Each \$2.00
M.L. 40 in. This tall blue Iris has great poise and charm. A true self of warm lobelia-blue with smooth hafts and white beards. Somewhat darker than Blue Rhythm, it is of distinctly different form, having widely flaring falls. They are only distantly related through a great grandparent—**SENSATION**. The flowers are large, the branching excellent, the growth robust. Our daughter, Flora, chose it as her favorite among the seedlings a few years ago and the name was registered. H.C., 1950.

FRANCES CRAIG (*Craig, 1952*) Each \$7.50
E. 38 in. This immense silvery lavender blue is one of the very finest of all the Mohr hybrids. Quantities of varieties have been raised in this general coloring but for substance, size, quality and color **FRANCES CRAIG**, without doubt, is close to perfection. One of the very finest varieties raised by Mr. Craig. A.M., 1955.

FROST GLINT (*Whiting, 1951*) Each \$1.00
M.L. 34 in. A cold blue-white of lovely form and extra heavy substance. Flowers are large with domed, ruffled standards and widely flaring, heavily ruffled falls. New blooms are heavily tinted blue but clear to white when fully open and each flower seems to last for days.

GARDEN FLAME (*H. Sass, 1941*) Each 75c, 3 for \$1.75

GLAD TIDINGS (Whiting, 1947) Each \$1.00

DWARF
IRIS

OUR "Dresden Doll" DWARF IRIS COLLECTION

HERE'S FRAGILE BEAUTY and true perfection in miniature. These lovely little Dwarf Iris, for all their daintiness and delicate appearance, are as hardy and prolific as the larger varieties. From 6" to 12" high, this is the perfect perennial for rock gardens and border treatments. In general, they are very early bloomers and act as welcome harbingers of spring, appearing about the time the first song of the migratory birds is heard in your garden.

10 First Quality, Mixed Dwarf Iris, Postpaid in U. S. Only **\$2.50**

BRIGHT CHARM

BRONZE LUSTER (*Milliken, 1955*) Each \$10.00

The throat coloring goes from yellow to green, giving the flower a very cool effect on a hot summer day. Each scape produces between 20 and 25 flowers, which are very resistant to the heat and sun of the Mid-West. Another grand Daylily from Geddes Douglas.

This broad petaled and sepal Daylily was a most excellent one in Missouri this season. The green cast at the base of the throat makes for a very cooling effect on a hot summer day.

44 in. M. Semi-Ev. Is a majestic Daylily which produces a prodigious number of large flowers of medium orange color on erect stalks through a long period. The flower segments have remarkable substance and withstand most adverse conditions. The wide petals open flat, with a gentle curve, and are handsomely fluted. The sepals are unusually prominent and two of them, never three, are distinctly pinched near their distal ends. The plants are vigorous, flower size 5 to 6 inches, and decreasing but little even at the end of its long period of bloom. The ability of Mrs. Bach's Daylilies to thrive in every section of the country destine Yellow Orchid to tremendous popularity. Description by Philip Corliss.

CEDAR STAKES

We have been asked many times by our customers for stakes to make a permanent label for their plants. The best we have found is a red cedar stake that will last for years. The cedar stakes that we offer are 12 inches in length by 1 1/2 inches in width and 3/8 inch in thickness; sharpened on one end so they can easily be driven in the ground. The stake should be painted with good grade of outside white house paint, let set for half hour and then print the name desired before the paint dries thoroughly.

Grand Rapids, Mich.

"Received cedar stakes and am very much pleased with them. They are very nice, and I shall use them right away."
